SAFE AND EFFECTIVE COOLING VESTS FOR KIDS!

This summer we had the pleasure of working with a local family in Stow, Ohio. Three of the children have varying levels of heat-sensitivity as a result of medical conditions. These active kids can't just stay in the AC and miss out on the fun of the summertime, so we were happy to help them stay cool!

Their three-year-old little boy was the inspiration for our newest cooling product, the **Cool Kids™ Toddler Stroller Seat**. He has IV line access in his chest and a feeding tube in his tummy, so at first we were concerned about the fit of our toddler cooling vest. It turned out to not be an issue at all and he loves his vest!

WE RECENTLY RECEIVED AN E-MAIL UPDATE FROM THEIR MOM, AMY:

"Benjamin has been doing so well. **He is probably the best he has been his entire life here on this earth.** We have been using his cooling vest like crazy. I really think it has made a huge difference in him. It does not seem to bother his tubes. And it keeps him from sweating which has really helped keep the dressing to his IV line intact."

"Here is a picture of all of the kids wearing their Polar Products!"

"He was very comfortable in his stroller with the pad. He wasn't sweaty when we picked him up out of the stroller like he normally would have been."

"My 12-year-old son loves his **Cool58® vest**. He is totally sold on how wonderful it is and says it's amazing. He likes it especially because it is easy to use and he doesn't need my help. He even wore it under his life jacket on the boat. **I can tell that it helped him not be fatigued as much and he didn't sweat like he normally would, which was a huge help in keeping him hydrated.** When I brought it home he said, 'I know this will make me feel better when I am out and during band camp too.' You have no idea how much this will improve his quality of life."

"We put Benjamin in the highchair by the dock. He can be with his siblings with his feet in the water and we can keep his tubes dry."

"We are so grateful for our Polar cooling garments. They have truly been a blessing. I have so many wonderful memories we have built this summer because my kids are more comfortable and I feel like I don't have to worry about them and how the heat is affecting them as much."
