

PEDIATRIC Body Cooling from Polar Products Inc.

LET THEM PLAY!

Heat sensitivity can be a difficult symptom for an active child or teen. We've helped kids with seizure disorders, ichthyosis, Dravet syndrome, Down syndrome, multiple sclerosis and other chronic medical conditions beat the heat.

Polar's cooling vests for toddlers, kids and teens use reusable, lightweight and non-toxic cooling packs that cool at a safe and comfortable temperature of 58 degrees Fahrenheit.

"This is Harmonie, my 2-year-old with epilepsy. She would have to enjoy her summers indoors if she didn't have this wonderful cooling vest. She is able to play outside without a care in the world. Thank you so much for your extremely fast shipping and the amazing and kind service!" – T.A.

COMFORTABLE • REUSABLE • SAFE • EFFECTIVE

"My son has a chromosomal abnormality that makes it difficult for him to regulate his body temperature. With your Cool Kids™ Cooling Vest, he is able to do so much more without becoming fatigued or over heated! Thank you!"

– Jennifer

"This Cool Kids™ Toddler Cooling Vest is a true lifesaver for my daughter. She has a skin condition called Ichthyosis that prevents her from sweating and regulating her body temperature. With this vest she is able to attend recess and PE with her friends at school and participate in other outdoor activities. The cooling packs stay cool for a long time in 80 degree weather." – C. in Texas

Polar Products Inc. is a leading worldwide manufacturer of high-quality, effective and affordable body cooling products for people of all ages with heat-sensitivity. Learn more about our company and products at www.polarproducts.com.

FROM EVERYDAY EXPERIENCES...

"My 12-year-old son loves his Cool58® vest. It is easy for him to use. He wore it under his life jacket on the boat and I think he was the most comfortable one of us. I can tell that it helped him not be fatigued as much and he didn't sweat like he normally would. That was a huge help in keeping him hydrated. He said, "I know this will make me feel better when I am out and during band camp too." You have no idea how much this will improve his quality of life.

My 3-year-old is wearing his toddler vest with his tube feed pump on over the vest. I think it's awesome he can wear his tube feed pump and life vest with his cooling vest on.

We are so grateful for our Polar cooling garments. It has truly been a blessing. I have so many wonderful memories we have built this summer because my kids are more comfortable and I don't have to worry about the heat affecting them as much."

- A. in Ohio

...TO MAGICAL ADVENTURES!

“As if having epilepsy and an extremely rare brain disorder were not enough to overcome in life, Kaylee doesn’t sweat due to a combination of her epilepsy medications and brain disorder. This makes even being in a hot room too much for her, placing her at risk of overheating and reducing her seizure threshold.

Imagine Disney in June! Well, thanks to the Cool Kids™ Toddler Cooling Vest from Polar Products we not only imagined, we conquered. Whether it was meeting some of her favorite princesses, hanging out with her family, or even riding roller coasters, her cooling vest was there! Easy refreezing with only ice and water made keeping her cool a piece of cake! Armed with an extra set of cool packs and the amazing flexibility to provide free ice water at Disney, we came, we saw, and we did everything that other peers her age can do! Thanks so much for such an awesome product!!” – G. in Kentucky

WRIST WRAPS

"I have been training horses and teaching riding lessons for almost 40 years, and the heat of the summer gets harder to take as I get older. I am so thankful for the cooling vest, neck wrap, and wrist wraps that allow me to continue working with horses in the stifling heat and humidity." – A. in Missouri

FREE EDUCATIONAL LITERATURE

Everyone is unique. It is important for your clients to choose the right type of cooling garments to meet their unique needs. Our informational materials can help your clients make informed choices about body cooling.
