

# Testimonials

what workers are saying.

"The Polar KMV is a lifesaver during hot weather!"

- Irv in Winnipeg, Manitoba

"We have a van-based traveling pizza kitchen for fairs and such in the summer. Last summer the temperature outdoors got to 104 degrees, but inside the van it hit 120 degrees! Our manager in the van used a Polar cooling vest and it was a lifesaver! We are very happy with this product. It works."

- Mark in Murfreesboro, TN

"It gets very hot in the orchards during harvest time. My workers all agree that the evaporative cooling vests and accessories work well and are comfortable to wear."

- John in Hastings, New Zealand

"The Cool Flow system is so easy to use. Just add water, some ice and turn it on. Instant relief! With the battery pack I can take it with me anywhere and be in total comfort."

- Avigdor in Hendersonville, NC

"The Kool Max cooling vest is very useful in my job. It is very difficult on those hot summer days to remain cool. With the vest I can reduce the heat by 15 degrees inside my uniform... it feels like a major difference to me."

- Megan in Akron, OH

"This KMV vest is lightweight and fits comfortably under my clothing. No one knows I'm wearing it but me... and what's even more amazing is that it works! This vest totally minimizes the debilitating effect that heat has on me."

- Arnold in Chicago, IL

"Thank you so much. These Kool Max products will help keep my core temp down when I need to be out in the hot and humid weather."

- Sue in Kansas City, MO

"The Kool Max cooling vest makes my job go a lot smoother. On those very hot days the cooling vest is a must. Without the vest my job would be much harder to withstand. Thanks for the cooling."

- Neal in Akron, OH

**& Safety**  
**Cooling Guide**

### The work itself is hard enough.

In high-temperature working environments, reducing the risk of heat stress results in fewer injuries and improved productivity. Our easy-to-use cooling systems improve efficiency as well as worker safety and comfort.

### Solutions for Cooling Every Body

Polar offers every different technology to help you stay cool and combat heat stress. We are happy to help you find the best cooling for your working environment. Give us a call!

### Cool Flow™ Circulating Water Systems

Ideal for machine, boat and vehicle operators. Cold water circulates from a cooling reservoir through this comfortable, lightweight vest or seat cushion. Standard 12V DC power take off and battery packs available.

### Kool Max Cool Pack Systems OUR #1 SELLING SYSTEM!

If you have access to a freezer, our reusable, non-toxic, and non-flammable Kool Max Cooling Packs cool the body for up to 3.5 hours in all climates. These easy-to-use vests provide cost-effective heat stress protection and can be worn under protective clothing. We offer several styles of vests, with optional hydration units and Nomex™ and Indura™ fire-resistant fabrics.

### Phase Change Cooling Systems

Deliver a constant temperature of 58° F for up to 3 hours. The reusable packs are non-toxic and non-flammable and may be activated by submersing in ice water. An optional hydration unit and Nomex™ and Indura™ fire-resistant fabrics are also available. PCCC attaches easily to hard hats.

### Evaporative Cooling Systems

No freezers necessary - Just add water! Evaporative cooling garments produce a natural cooling effect as water evaporates. They are inexpensive, lightweight and ideal for travel. Evaporative cooling works best in drier climates such as the Southwest United States, or on those low-humidity days elsewhere.
