

# Deluxe Cooling Hats

**Polar cooling hats work with either our lightweight, Cool58® pack inserts or our Cool Comfort® Performance water activated inserts. The inserts are interchangeable.**

*This hat includes one or more of the following inserts for convenient cooling relief.*

**COOL58® PHASE CHANGE COOLING PACK INSERT**

The Cool58® Phase Change Cooling Pack insert provides direct cool relief in any climate. The Cool 58® Phase Change Cooling Pack **freezes at 58°F** (14.4° C) and provides a comfortable, constant cooling temperature of 58°F for up to 1 hour. The pack can be recharged in a cooler of ice water in **just 15 minutes!**

**WATER-ACTIVATED COOL COMFORT® COOLING HAT INSERT**

Reusable Cool Comfort® insert uses special water absorbing polymers that soak up many times their volume in water and then **maintain the temperature of the water for an extended period of time.** Hat insert can be chilled or frozen for additional cooling energy. Additionally, in drier climates, the insert will provide hours of evaporative cooling.

**HAT TYPE:**

- Baseball Cap**     **Straw Hat**     **Bucket Hat**     **Other**

## Advantages of the Polar Deluxe Cooling Hat:

**EFFECTIVE AND COMFORTABLE RELIEF**

Our inserts velcro easily into the top inside of the hat. They are interchangeable to provide the right cooling in any situation.

**DISCREET AND LIGHTWEIGHT**

The Cool58® insert is a lightweight, segmented pack that molds to the hat. The Cool Comfort® insert is water activated and the weight can be controlled by how long it is submerged.

**QUALITY MATERIALS**

The Polar hat and hat inserts are designed to provide long-term performance. They will last many years with proper care, maintenance, and storage.

**IMPROVES PERFORMANCE, SAFETY AND COMFORT**

Cooling lessens the debilitating effect of heat during work, athletics and day-to-day life for those with heat sensitivity.

## DIRECTIONS FOR USE

Activate each cooling hat insert as needed according to the instructions below. When activated, place the insert (with cover if Cool58®) in the hat or transport in a cooler.

### Cool Comfort® Water-Activated Cooling Inserts

**First time activation:** Submerge in cool water for 15 minutes. Remove and gently distribute the polymer throughout the polymer pocket(s). Re-submerge in cool water until the insert reaches the level of hydration you desire. The amount of water absorbed, and therefore the weight of the insert, may be controlled by how long you soak it.

**Please note:** When properly hydrated, each crystal inside will become the size of a pea, and the insert will not be bulging at the seams. Removing excess water before wearing will ensure the garment is lightweight and effective. There may be a slight excess of crystal gel on the exterior if the insert is overhydrated; this is not a problem.

**Future activations:** The insert may be reactivated by placing in cool water for 10 minutes (or more depending on preference).

**Dry:** After activation in water, gently squeeze and towel dry. The insert may also be hung in a well-ventilated area and allowed to dry to the touch or spun dry in a washing machine.

**Additional Cooling:** Once fully activated and dried, the insert may be chilled in the refrigerator or frozen in the freezer. Note: One or more layers of insulating fabric should always be worn between the skin and the insert when used from the freezer.

**Note:** Soak just the Cool Comfort® insert in water; it is not necessary to soak the hat.

### Cool 58® Phase Change Cooling Pack

Place the pack in a bucket of ice water, refrigerator, or freezer until frozen hard. The pack turns solid white when it is activated. When ready to use, simply remove the pack from the ice water, refrigerator, or freezer, place in the cover and then velcro into the hat.

## CARE AND STORAGE

Hand wash the hat insert in cool water with a mild detergent. Hang in a well-ventilated area to dry. Cooling packs may be wiped clean with a damp cloth. Allow the Cool Comfort insert to completely dehydrate (ie, the gel returns to a crystal state) before extended storage.

**Note:** Store packs in a cool, dry environment when not in use.

## WARNINGS AND CAUTIONS

**Consult your health care professional prior to using this or any cooling products for a medical condition.** Cool Comfort® products are designed for the specific objective of cooling the body. Polar Products recommends that all cooling products, when used from the freezer, be worn over clothing or other fabric layers to regulate the garments' cooling potential. The amount of layering required to ensure the highest level of cooling and comfort will vary from person to person and is strictly the responsibility of each individual user.

**Polar Products Inc. will not be liable for injuries or damages resulting from misuse or misapplication of our products.**
