

Active Ice® Cold Therapy Shoulder Pad 12" Extension #XT1

The Polar Products Active Ice® Cold Therapy Shoulder Pad works great for most people. We have found that for a small number of people connecting and disconnecting the bladder from the reservoir hose can be difficult, especially if they are alone and do not have help. For some, a 12" extension length of hose helps in doing this. For this reason, we are offering this extension for just \$15.00 with no shipping cost. Call our customer service at the number below to order. Thank you and we hope your shoulder system helps in a speedy recovery.
