

CHOOSING THE IDEAL COOLING VEST

1 WHICH REUSABLE COOLING TECHNOLOGY SHOULD YOU CHOOSE?

KOOL MAX®

Cooling vests with Kool Max® frozen water-based cooling packs fit into insulated pockets. Packs require access to a freezer and 2 to 3 hours to charge. They offer the highest level of cooling energy. *It's science! It takes more energy to charge these packs in a freezer and in return, the packs offer greater cooling energy for a longer time.* Vests will cool for approximately 3 to 4 hours; accessories will cool for 1 to 2 hours.

COOL58®

Cooling vests with Cool 58® phase change cooling packs fit into insulated pockets. Packs freeze at 58°F (14.4°C) and provide a comfortable, constant cooling temperature of 58°F. Vests will cool for approximately 2 to 3 hours; accessories will cool for 1 to 1.5 hours. Ideal choice when freezers are not available; these packs can be recharged in a cooler of ice water in just 15 to 20 minutes or a refrigerator in 1-1.5 hours.

2 WHICH STYLE OF VEST WOULD YOU PREFER?

ADJUSTABLE VESTS

This cooling vest has adjustable hook and loop straps at the chest, waist and shoulders for a snug, comfortable and customized fit.

Adjustable vests come with 4.5" x 6" packs or two sizes of segmented strip packs.

4.5" X 6" PACKS

Adjustable vests with 8 to 12 packs allow the cooling to be strategically concentrated along the spine in back. This configuration also allows the user to adjust the number, location and weight of the vest as desired. Many people may only need the packs along the spine, or around the waist, etc. Additionally, the number of packs the vest comes with, and therefore the weight when all packs are used, varies depending on the vest size. Vests with these packs are available in khaki, blue, gray and black.

SEGMENTED STRIP PACKS

Adjustable vests with four segmented strip packs in two sizes: 400 gram 4.5" x 12" or 500 gram 6" x 15". These packs are convenient to change out in the vest. Vests with these packs are available in khaki and blue.

"I am an R.N. working in a surgery center where we do a lot of pain management procedures using live x-ray. It requires wearing protective lead gear. It gets unbearably hot. I got this vest a few months ago. It has been worth every penny. Most of my packs are at least partially frozen after 3 to 4 hours depending on the location in the vest.

Now I need another one for working outside at home!"

-Ellen in Colorado

FITTED FASHION VESTS

This vest comes in both a women's and men's style. It has a clean look with no adjustments and is lightweight with 5 to 10 cooling packs depending on size. The packs are strategically concentrated along the spine in back. It can be worn over or under clothing. The fashion vest comes in a 97% cotton / 3% spandex blend that provides a snug fit with a little stretch.

WOMEN'S FASHION VESTS

The women's vest comes in black, khaki, light blue, and pink. Pack placement depends on the size of the vest. There are two outside side pockets. Sizes range from XS to 4XL.

MEN'S FASHION VESTS

The men's vest comes in black, gray and khaki. Pack placement depends on the size of the vest. There are two outside side pockets. Sizes range from S to 4XL.

3 WHICH FABRIC WOULD YOU PREFER?

COTTON

Light weight and breathable 100% cotton twill.

NYLON

100% 2 ply soft breathable. Easy to clean and can be wiped down.

97% COTTON / 3% SPANDEX BLEND

High quality breathable fabric blend provides a snug fit with a little stretch.

The adjustable vest is available in both cotton and nylon fabric. The cotton fabric vest is available in khaki, blue and black. The nylon fabric vest is available in blue.

The Fashion Vest is only available in the 97% cotton / 3% spandex fabric. See women's and men's fashion vest descriptions for available colors.

"We love the new Nylon cooling vest! We really like the new material that allows the vest to be wiped down. We will be ordering more."

-Darrel in Georgia
